EXPERIENCE

DRW Trading
Full Stack Web Engineer, Aug 2016 - Apr 2021
- Lead and collaborate large internal web applications using modern JavaScript (React/NodeJS/Typescript) and GraphQL, deployed with Kubernetes
- Develop middleware services and APIs using Python and AWS
- Provision Linux server environments using Ansible playbooks to ensure identical and repeatable results
- Own and create build/deployment pipelines for multiple projects, including CI/CD and testing
- Work along side teams from all over the firm, satisfying a wide range of requirements for unique cases

50,000feet
Front-end developer, Nov 2015 - Aug 2016
- Lead large scale web projects using Drupal CMS (PHP) and modern JavaScript
- Develop specialty web applications for large brands with JavaScript and various third party APIs
- Provision linux server environments with the LAMP stack

TEN7 Interactive
Front-end developer, Dec 2013 - Oct 2015
- Create responsive, lightweight themes for mid to large scale Drupal sites
- Maintain and contribute to Drupal modules written in PHP
- Manage deployments and Linux server environments for numerous clients
